Texas Pension Review Board

House Pensions, Investments, and Financial Services Committee

March 10, 2021

PRB Mission

- The PRB is composed of 7 members appointed by the Governor.
- The Board oversees all 347 Texas **public retirement systems**, both state and local, to monitor their actuarial soundness and compliance with certain state law.
- Of the 347 systems, 100 are actuarially funded defined benefit plans, for which total net assets are approximately \$301 billion, and total membership is over 2.95 million members.
- Of the 100 defined benefit plans:
 - ☐ 7 are **statewide** retirement systems
 - ☐ 17 are major municipal retirement systems
 - ☐ 42 are paid/part-paid firefighter systems
 - ☐ 34 are local retirement systems offered by other political entities

Primary Duties

- Conduct a continuing reviews of all Texas public retirement systems
- Conduct intensive studies of potential or existing problems that threaten the actuarial soundness of public retirement systems
- Provide information and technical assistance
- Recommend policies, practices, and legislation to public retirement systems and governmental entities
- Develop and administer an educational training program for trustees and administrators of retirement systems
- Prepare actuarial impact statements for pending legislation

PRB Pension Funding Guidelines (effective 6/30/17)

- 1. The funding of a pension plan should reflect all plan obligations and assets.
- 2. The allocation of the normal cost portion of the contributions should be level or declining as a percentage of payroll over all generations of taxpayers and should be calculated under applicable actuarial standards.
- 3. Funding of the unfunded actuarial accrued liability should be level or declining as a percentage of payroll over the amortization period.
- 4. Actual contributions made to the plan should be sufficient to cover the normal cost and to amortize the unfunded actuarial accrued liability over as brief a period as possible, but not to exceed 30 years, with 10-25 years being a more preferable target range.* For plans that use multiple amortization layers, the weighted average of all amortization period should not exceed 30 years.* Benefit increases should not be adopted if all plan changes being considered cause a material increase in the amortization period and if the resulting amortization period exceeds 25 years.
- 5. The choice of assumptions should be reasonable and should comply with applicable actuarial standards.
- 6. Retirement systems should monitor, review, and report the impact of actual plan experience on actuarial assumptions at least once every five years.

^{*}Plans with amortization periods that exceed 30 years as of 6/30/2017 should seek to reduce their amortization period to 30 years or less as soon as practicable, but not later than 6/30/2025.

Funding Soundness Restoration Plan

- If a retirement system receives several consecutive valuations showing that the system's amortization period exceeds 40 years, the system's governing body and sponsoring entity must formulate a FSRP and submit the plan to the PRB.
- The FSRP must be sufficient to reduce the amortization period to 40 within **10 years**. Plans must report **updates** at least **every two years**.
- 16 systems have submitted FSRPs.
 - Nine systems have achieved their goal and are below 40 years.
 - Four other systems are working on developing a Revised FSRP since the initial FSRP was not met, including one plan subject to a second revised FSRP.
 - The remaining three systems are working towards a 40-year amortization period.
- Three systems are subject to the requirement but have not yet submitted their FSRPs.
- Thirteen more systems are at-risk of becoming subject to the FSRP requirement and have submitted at least one valuation with an amortization period greater than 40 years.

Intensive Actuarial Reviews to Date

January 2018	April 2018	October 2018	October 2019
Galveston Police Greenville Fire	Beaumont Fire Marshall Fire	Longview Fire Orange Fire Irving Fire	Odessa Fire Paris Fire

Recommendations:

- Adopt a funding policy that requires payment of an actuarially determined contribution, or at minimum, that fully funds the plan over a finite period of 30 years or less
- Adopt a formal risk/cost-sharing framework with "guardrails" or triggers that reduce uncertainty and guide stakeholders in how benefit and contribution levels will be modified under different economic conditions
- Closely monitor investment performance including asset allocation and expenses
- Conduct an in-depth asset-liability study of potential risks associated with existing asset mix and liabilities they support. Perform scenario testing of large PROP withdrawals coupled with potential adverse investment experience
- Regularly review actuarial assumptions against experience, making necessary changes
- Complete required training so that the board can make informed decisions

Minimum Educational Training (MET) Program

- The 83rd Texas Legislature required the PRB to establish the MET Program for trustees and system administrators of Texas public retirement systems, including providing online training.
- New public retirement system trustees and administrators are required to take a minimum of 7 hours of training within their first year of service; minimum of 4 hours every 2 years thereafter.
- The following provides overall MET compliance by retirement system type:

Statewide: 95.2%

Municipal: 94.4%

Local Fire Fighter: 74.5%

Special District and Supplemental: 73.6%

The full <u>MET Compliance Report</u>, organized by system, can be found on the PRB website.

Agency Activities & Update on New Requirements for Texas Plans

Major Agency Activities FY 2019-2020

- Adopted rules, published guidance and designed templates to assist
 systems in achieving compliance with new statutory requirements
- Analyzed investment performance evaluations and summarized the information in the PRB's first Investment Performance Report
- Collaborated with stakeholders throughout the biennium, culminating in <u>legislative recommendations</u> to help enhance transparency and responsible pension funding

Monitoring Legislation: SB 2224

- SB 2224 (86R) required all public retirement systems to adopt a written funding policy.
 - The PRB has received **96 out of 100** funding policies
 - The PRB has done the following to help implement SB 2224:
 - Worked with systems to develop and issue guidance;
 - At the request of the systems, provided a sample funding policy;
 - Encouraged systems to work with sponsors to craft the funding policies;
 - Notified sponsors of the new statutory requirement.
 - A summary of the funding policies received through the end of 2020 is available in the PRB's biennial report.

Monitoring Legislation: SB 322

- Investment Expense Reporting
 - To assist retirement systems in compliance with the new requirement, the PRB has engaged with systems and addressed concerns surrounding the requirement; published <u>rules</u> to assist with reporting investment expenses; and created a <u>template</u> and an <u>asset class guide</u> as requested by systems for further assistance.
- Investment Practices and Performance Evaluation
 - Systems with at least \$30 million in assets were required to select an independent firm to evaluate the system's investment practices and performance and to provide recommendations for improvement.
 - The PRB has **adopted guidance** detailing the elements of the evaluation and clarifying what constituents an independent firm.
 - The PRB created an Investment Committee to submit an investment performance report to the Governor and Legislature.

Investment Performance Report

- Texas Government Code Section 802.109(i) requires the PRB to submit an <u>Investment Performance Report</u> that both compiles and summarizes the information from the evaluations and include the report in the agency's Biennial Report to the Legislature.
- This report contains aggregate analysis of the evaluations, a summary of each individual evaluation and resources including a compilation of references from the evaluations to help systems access best practices and relevant benchmarking resources.

Recommendations to the 87th Legislature

Funding Policy Statute

Add the plan sponsor to the funding policy requirement.

Funding Soundness Restoration Plan (FSRP) Statute

- Increase sponsor accountability and tie funding policy and FSRP together.
- Update the threshold, target and trigger.
- Update timelines and consequences if original FSRP is not working.

Investment Performance Report

- Amend statute to require evaluations to detail how the evaluator determined the need, or lack thereof, for any recommendations.
- Amend statute to require a formal review-and-comment process before publication.
- Review and consider the feasibility of whether an independent firm conducting the evaluation should be a different firm from the one that helped the system develop its existing investment policies, procedures and practices.
- Amend statute to require evaluators to identify their qualifications and potential conflicts-of-interest, codifying existing PRB informal guidance.

Key Metrics for Texas Public Pensions

Key Actuarial Measures

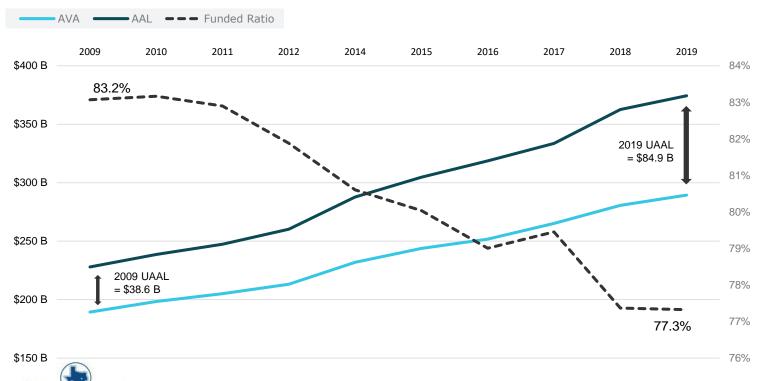

- <u>Two measures</u> frequently used to assess a system's <u>financial health</u>: funded ratio and amortization period.
- <u>Funded Ratio</u>: It is the proportion of a system's accrued liabilities that are covered by the assets. It is the ratio of the assets to the liabilities (AVA/AAL).
- Amortization Period (Am. Pd.): The amortization period or funding period is the expected period of time for a system to pay off its unfunded liability (UAAL).

Assets - Liabilities Trends

Since 2009, the overall unfunded actuarial accrued liability (UAAL), has steadily increased from \$38.6 billion in 2009 to \$84.9 billion in 2019. The aggregate funded ratio, in turn, has decreased over time from 83.2% to 77.3%.

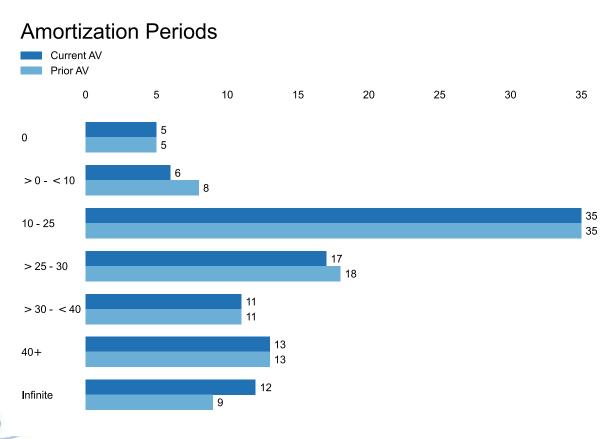

Actuarial Asset-Liability and Funded Ratio Trends

Amortization Periods

The PRB *Pension Funding Guidelines* establish a maximum amortization period of not more than **30 years** with a preferred target range of 10 to 25 years.

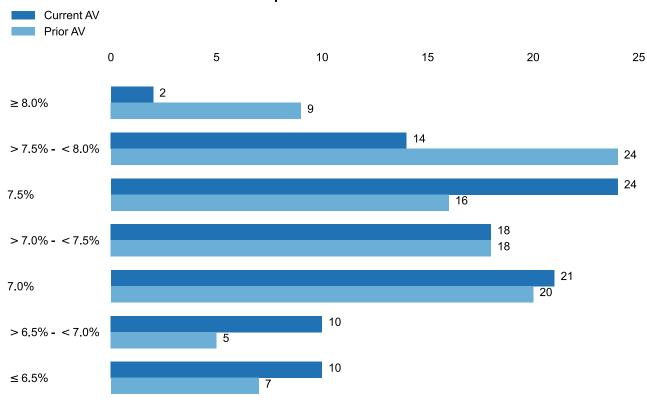

Assumed Rates of Return

- The average assumed rate of return for Texas retirement systems is currently
 7.17%. The national average is 7.18% (NASRA, February 2021).
- In response to projected market conditions and actual plan experience, retirement systems across the country, including Texas, have reduced their return assumptions in recent years and we expect this trend to continue.
- The rate of return assumption is a key economic assumption that has an inverse correlation with the liability and short-term contribution requirements of a plan. A higher return assumption leads to a lower liability and contribution requirement and vice versa.
- ERS lowered its return assumption in 2018 from 8% to 7.5% and again in 2020 to 7%. TRS lowered its return assumption from 8% to 7.25% in 2018.

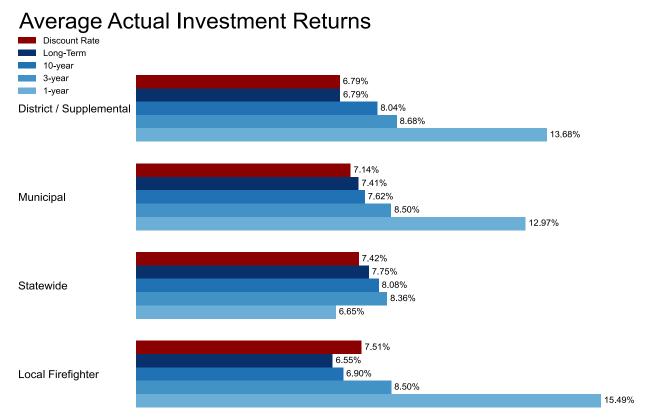

Investment Return Assumption Trends

Investment Return Assumptions

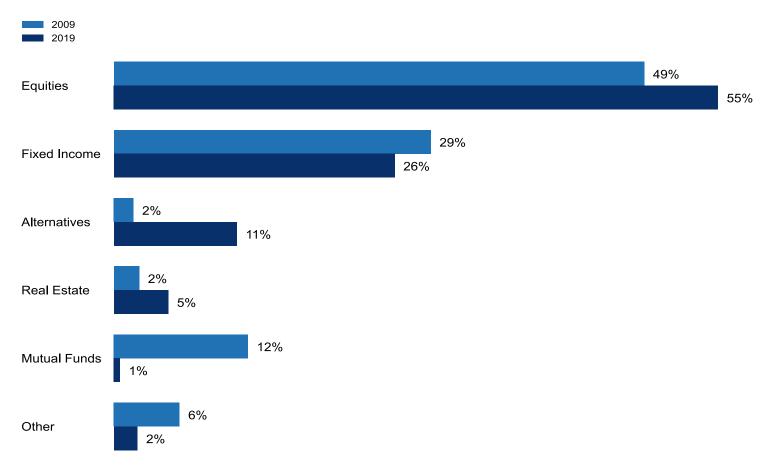

Average Actual Investment Return Trends FY 2019

<u>Fiscal year 2019 returns generally exceeded assumed rates of return by a large margin for plans with a December fiscal year end, which is approximately two-thirds of all plans.</u> Long-term return is 30 years or longest term available. All figures are net of fees. Assumed returns obtained from most recent actuarial valuation reports.

Average Asset Allocation FYE 2009 v 2019

Other includes: capital assets, receivables, securities lending collateral, liabilities and cash. The allocations provided are an unweighted average of all Texas defined benefit plans. Figures are obtained from the annual financial reports and may differ from allocation targets in investment policy statements.

COVID-19 and Texas Plans

- The impact of the COVID-19 pandemic on Texas public pension plans is still emerging. The pandemic has the potential to affect plan contributions, investment returns, and demographic experience.
- In the near term, the most significant impacts are likely to be budgetary constraints. Decreased revenues and increased costs for the plan sponsor make it more difficult to address potential contribution shortfalls.
- The long-term impacts are uncertain, but persistent low interest rates may force plans to continue to reduce expected investment returns, thereby increasing the needed level of contributions. This will be further exacerbated if total payroll growth is lower than expected.

Texas Public Pension Data Center

This data center is meant to provide lawmakers, taxpayers, pension systems, and other stakeholders with current, historical and comparative public pension information. As part of its mission, the Pension Review Board compiles and reviews data from state and local public retirement systems in Texas. This website contains information reported by retirement systems to the PRB.

VIEW DATA

The 100 plans

There are 100 actuarially funded defined benefit public pension plans registered with the PRB. The total membership of these public retirement systems is more than 2.95 million active and retired members, and the total net assets of the plans are approximately \$301 billion. The 100 plans include:

7

statewide plans including 2 cash balance plans that municipalities, counties and districts may join 17

major municipal plans including 14 in state law and 3 in local ordinance

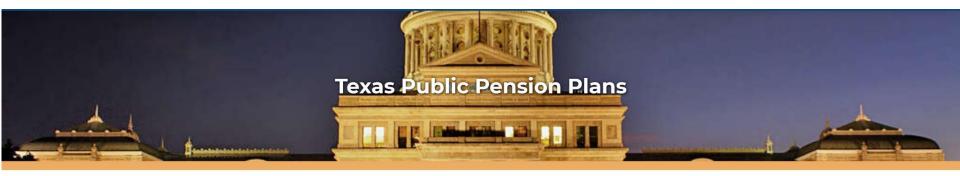

42

local firefighter plans organized under the Texas Local Firefighters Retirement Act 34

local plans administered by special purpose districts or as supplemental plans

PRB Online Data Center – Plan Data

available at: https://data.prb.texas.gov/

This data center is meant to provide lawmakers, taxpayers, pension systems, and other stakeholders with current, historical and comparative public pension information. As part of its mission, the Pension Review Board compiles and reviews data from state and local public retirement systems in Texas. This website contains information reported by retirement systems to the PRB.

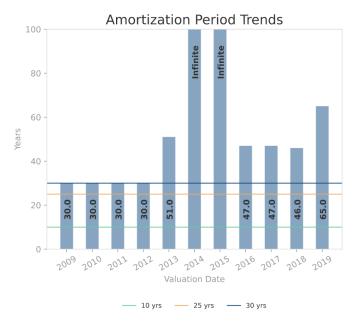

Dallas Employees' Retirement Fund

Membership	Total Net Assets	Social Security	Contributions	Contribution Type	Fiscal Year End
Active: 7,427 Annuitant: 7,405					December

The Dallas Employees' Retirement Fund was established by ordinance in November 1943 and became effective in January 1944 after ratification by the voters of the City of Dallas. The Plan derives its authority from Chapter 40A of the Dallas City Code. The Plan is a single-employer defined benefit pension plan that provides retirement, disability, and death benefits to its members, and is sponsored by the City of Dallas. All employees of the City are members in the Plan, except police officers, firefighters, elected officers, non-salaries appointee members of administrative boards or commissions, part-time employees working less than one-half time, temporary employees, individuals working under contract, and individuals whose salaries are paid in part by another government agency.

A retirement system's effective amortization period is defined by the PRB as the time it would theoretically take to fully fund the system's unfunded actuarial accrued liability (UAAL), if any exists. The effective amortization period assumes no future gains or losses and factors in both the plan's stated and historical contribution policy. The calculation is done at each actuarial valuation which is conducted every year or every two years. If no bar appears for a particular fiscal year, the amortization period is zero.

PRB Online Data Center – Comparative Data

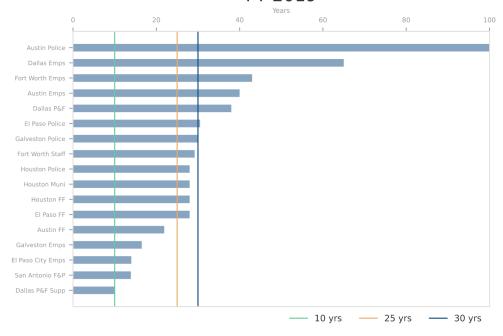

Municipal FY 2019

There are 17 municipal retirement systems including 14 systems enabled by Article 6243, Vernon's Civil Statutes and three created by city ordinances or charters, which are the Dallas Employees' Retirement Fund, City of El Paso Employees Retirement Trust, and Galveston Employees' Retirement Fund.

Amortization Period FY 2019

A retirement system's effective amortization period is defined by the PRB as the time it would theoretically take to fully fund the system's unfunded actuarial accrued liability (UAAL). The reported amortization period takes into account the plan's amortization policy and contribution history. The chart displays Municipal retirement systems' effective amortization periods for the selected fiscal year. If an actuarial valuation was not completed al year, the immediately preceding fiscal year is shown.

Notes

- (1) Plan status indicates whether a plan is active (admitting new hires), closed to new hires (but still accruing benefits), or frozen (not accruing benefits).
- (2) The effective amortization period is the time it would take to theoretically eliminate the UAAL assuming no future gains or losses and taking into account both the plan's stated and historical contribution policy.
- (3) Reported amortization period is based on an open amortization funding policy.
- (4) Amortization period is calculated using system-wide aggregate UAAL and payroll amounts.
- (5) Amortization period is calculated by the PRB.
